Nurses Received Caps Friday Night

Last night, February 11, nine student nurses of the Little-Griffin Hospital, Valdosta, were capped in the GSWC auditorium. This is the second class to graduate since the re-opening of the Little-Griffin Nurses School.

The presentation of the caps marked the ending of a five-month pre-clinical period of classes both at the hospital and at GSWC. These are the girls who have risen at dawn’s early light and have worked in the hospital and at GSWC. They have spent their time from 6:00 a.m. to 11:00 p.m. in the hospital and GSWC.

The nurses will begin work on the floor and be distinguished from the students by their caps. Next year, they will be enrolled in The Johns Hopkins Hospital, in Baltimore, Maryland, for a period of seven months’ advanced study. After two more years at Little-Griffin Hospital, they will graduate as Registered Nurses.

Aliss Anne Lou Overton is in charge of the student nurses. Miss Mary Brown is the head nurse and who spoke on the ‘nurses’ cap’ and after the presentation of the caps.

Other officers of the Little-Griffin Nurses School are: Misses Betty Geer, Misses Barbara Schaefer, and Mr. James Johnson.

The nurses will be in charge of the ‘Y’ work on campus for the spring quarter and the going is hard for the nurses aides. Next Spring, the nurses will be enrolled in The Johns Hopkins Hospital, in Baltimore, Maryland, for a period of seven months’ advanced study. After two more years at Little-Griffin Hospital, they will graduate as Registered Nurses.

Sorrowfully I took leave of my parents and boarded the crowded bus with my books and luggage. I was not at all looking for someone to share a chair or arm to lean upon. But no, in this time and this land of strange people, I had better not trust a soul. So I stuck my head in a book and feigned interest.

To my right sat a young mother and her little boy, dirty, with a shabby suit on and a running nose. Behind them sat two elderly looking women. How I would have given it all back if I could! There they sat, like a great dark cloud, and this was no time to talk with anyone. The Negroes were sitting in the aisles, and although I could hear them, I did not desire to listen. The cigarett smoke filled the almost-darkened bus. I felt myself grow faint from the stale smoke, but it was too late. The people of Alexico were like a vast sea of humanity, and I had found no one to talk to.

The love story tells of the life of a girl named Dolores, who was brought up in the house of her grandparents. Being born half Indian and half Spanish, she had many problems that at times seemed insurmountable. Before the war, she had fallen in love with a girl at the pottery factory in Dolores, and throughout the war she was haunted by the knowledge of what the Spaniards were doing to the people in the small towns of the Southland. The story is a deep feeling and touching novel.

The cigarette smoke filled the almost-darkened bus. I felt myself grow faint from the stale smoke, the multitudinous perfumes, and the smell of human bodies. Still the bus went on, and now I couldn’t bear it at all. The loud voices, and shouts of coarse laughter filled the bus. My stack of books and my suitcases grew even heavier, for there was no one to help me. No one to help me. I was alone and helpless.

Gradually a faint light appeared ahead. The bus began slowing down and the funny passengers began rearranging themselves. The little boy began crying. No one paid any attention to him, for his mother had become interested in the now thoroughly amused Naval officer. The Negroes were lying in the aisle, sleeping, as they could. A note to last article in a quarterly series

Look not now into the papers in the not-too-distant-future, but into the past. This admirable, estimable, and unselfish point really put Miss Smith's election in the bag, for who could resist?

Virginia Smith was just elected first woman Governor of Georgia by an overwhelming majority. Governor Smith's platform was extreme. Her most delusive, deceiving, and distinctive policy was the assurance that each woman would be given "forty acres and a man." This admirable, estimable, and unselfish point really put Miss Smith's election in the bag, for who could resist?

MISS MILLER can do many divers dives. Just last week she was seen standing at the table at the "Pink Elephant" when the joint was raided by police. Ruby Lacey, the Lucretia Borgia of our day, has just buried her eighth husband, which, incidentally, is said to be a world's record. It had no effect on her whatsoever, but then I don't guess poison ever would!

What It Is?

By JENNIFER SMITH

"Isn't it beautiful? So sleek! So different! I wish I had one like it, but they are so... say, what is it anyway?"

Yes, it is confusing. Today you see them all over the streets and byways of America. Of course, the honest, hardworking, avante garde Mr. John Doe can't have a new one as often as he would like (every time the style changes).

What is it? Why, the new automobile! Nearly everyone has seen the privileged few drive these never-before-seen wonders around town. They sure are nice, I guess, but the shapes! Wow! Some of them resemble ancient castles with all the new fender features. Others look like the last bits from the circus act on them by mistake. Few have ever been treated as if they were taffy and stretched at either end with a large piece left in the middle.

Of course, car dealers advertise that there is "more room between the front and back seats." Pity the poor unfortunate like me with big feet who will have to sit facing the side instead of straight ahead. There isn't room to stretch these long appendages of mine on those dull, tedious trips. I have always sudd... "Their seats now have the new "air-spun " features. That simply means they are "twice as soft and comfortable for long business trips."

I have always said, "The softer the bed, the longer the sleeper." The same might apply to the softer seats. Think of the accidents that might happen because of the driver going to sleep! When you take a little trip, the motor may not catch and there may be a long brake job. We all have heard of the sudden stop, and the out of control car.

On some cars, the starter has been moved from the floor to the dashboard, where it is out of reach of the driver and can be pulled or pushed with a long handle. The lights, the cigarette lighter, the defroster, the heater, the extra backing fight, or the radio on the control panel are all out of reach, which is a great improvement.

The motors are better; the bodies are more streamlined; the colors more unique. All these facts are a few reasons that millions of people are rushing to their dealers to place an order for a car. No matter what they think about American cars, people will buy them if they can scrape up the money.

So on the way down to purchase yours, don't waste precious time standing and watching them on the streets. You couldn't tell whether some were coming or going because of the rush. And here's what's going to happen; every time you swing in Reverse, you'll have to scrape out another button "way over there in the corner is the starter!"

M. E. Crea, poor thing, wandering around the Ad Building in her tennis outfit hunting the tennis courts.

Seniors awakened(?) at 12:30 Wednesday night when some incautious person set the alarm clock in the hall to show her Heart-Sitter where a present was. A young girl two seats down, seemed a lot better, yet so happy. An older woman, probably her mother, sat with her. Two colored passengers sat near the driver, numbing softly to themselves.

The old gentleman seemed to be just sitting, not talking, for they all seemed to be waiting for something.
