Scock'n Buskin Club To Present "Bus Stop"

By Angelyn Webb

The Sock 'n Buskin Club will present Bus Stop, a three-act romance, by William Inge, in Pounds Hall on November 15 and 17, 1961. The cast includes Sandra Phillips as Elma Duckworth, a waitress; Carol Greene, the restaurant owner; Phillip Hart as Will Masters, a sheriff; Gail Thomas as Cheer, a chanteuse; Reddy Lawrence as Carl, a bus driver; Grady Mills as Dr. Gerald Lyman, a former college professor; George Hubert as Virgil Blessing, a ranch hand; and Mickey Short as Bo Decker, a young ranger and cowboy.

The story is a warm and sensible little overnight spill between a couple of stranded, stubborn, appealing people. A bus out of Kansas City pulls up at a cheerful roadside diner in the middle of a howling snowstorm. All roads are blocked and four or five weary travelers are going to have to hold up until morning. Cheer, the passenger with most to worry about, is in love with Bo Decker, but has no idea he is not only a Nazi sympathizer, just come to face himself, and a middle-aged scholar comes to face himself, and a young girl who works in the cafe gets hopelessly involved.

The production staff will be composed of students taking Speech 300.

Calendar Girl Contest Tonight

Tanaka Kappa Epsilon will present its annual Calendar Girl Contest tonight at 8 p.m. in the VSC gym. The theme of this year’s contest is “City of Peace,” and the events will be broadcast by WVLD Radio.

By Emily Leonard

A tree, with roots near the surface will topple at the slightest hint of wind. A house with shallow foundations won’t endure.

The higher the tree and building, the deeper the foundations must be. You are able to see the height, but the lowliness is hidden. If the roots weren’t this lowly, the tree couldn’t be so lofty.

Therefore, dig a deep foundation of humility, so that the height hoped for may be reached.

The thing that college often fails to teach is a deep sense of humility. Life alone is the teacher, and the lesson is long and hard.

The difference is great between the humble and boastful. Each one is a Narcissus of humility. Life alone is the teacher, and the lesson is long and hard.

The outer would be nothing if the inner was not. Life alone is the teacher, and the lesson is long and hard.

One thing that college often fails to teach is a deep sense of humility. Life alone is the teacher, and the lesson is long and hard.

The difference is great between the humble and boastful. Each one is a Narcissus of humility. Life alone is the teacher, and the lesson is long and hard.

The outer would be nothing if the inner was not. Life alone is the teacher, and the lesson is long and hard.

We must be able to see the individual the right to make the decision.

Extra-curricular activities are good, but they are not necessary—but they should not be required! The Education and Business Administration Departments and all business majors should belong to Phi Beta Lambda. However, the American student is a student and he should try studying in our own classrooms and see how much she gets on her own.

In closing, I wish to make unqualified statement: We should tone down those vocal chords, that we can bring our own beauty.

Name withheld.

Editor:

The condition of the world is that it is just now passing through a period of relative calm. I firmly believe that the Federal Student Exchange Plan will allow us to obtain our understanding. This is a way to make some portion of the young people learn to understand the facts and feelings of other men.

The leaders of tomorrow, and experience is certain to be of great importance.

Glenda Stone.

Editor:

Are you a member of the College? Yes, I have a membership, but I think there is much to be done to improve it.

The VSC is very fortunate to have some of these exchange students enrolled here.

I hope that our students will not grow more preparing to be a VSC representative to Japan. Dr. Moreton will take care of this matter.

We hope that you, our fellow students, will try to make contact with us.

In 1951, he and his wife went on a long visit to the United States of America. Dr. Moreton re Jesús the direction of this work.

Dr. T.H. Moreton

Letters to the Editor

Editor:

I would like to voice a protest against the type of movies shown in our local theaters on week-ends. While many of these movies are always shown early in the week when teenagers are supposed to be in school, when we could really enjoy a good show, the only choices we have are between some western pictures and horror movies.

Is there anything we college students can do to try to get some of the better movies booked for week-end showings once in a while?

Avie Sue Flanagan.

"YOU ALWAYS HURT THE ONE YOU LOVE"

By Roz Sprayer

"You always hurt the one you love." How true that statement was many times, you do or say things on the spur of the moment, not actually realizing how much it hurts to person you love. You may ask yourself, "why did I say that?"

This question is not easily answered. There could be many reasons for hurting someone very dear to you. One could be jealousy, and another could be pure selfishness.

Webster defines jealousy as the demand for exclusive affection or attention, and sometimes a person can demand too much from another; this leads to selfishness, caring only for one's own desires or needs. True love should be excluded of both of these. But it very seldom is.

The way in which you hurt a friend is the way in which you give the one you love very much.

Stop and think, the next time you start to say something uncall- ed, just remember the way you want him to, and you may hurt someone you love very much.

Remember, "You always hurt the one you love; the one you shouldn't hurt at all."
Campus Personalities

Robert Bailey, a well-known rampaging Rebel and short 'n sweet Polar Bear, has been featured as a campus personalities for this edition.

Jeanie, a senior elementary education scholar, hails from Cairo, Georgia. She is president of Alpha Delta Pi sorority and the senior representative to the pledges. The Pledges can include the Education Club, Sigma Phi Epsilon sorority, and first vice-president of the WRSC. She is the leader of the Alpha Delta Pi National Convention in Los Angeles, California. On her return trip, she spent ten days in Las Vegas with relatives.

spagetti supper, the date of which will be announced later.

Pi Kappas Phi is proud to have Mr. Brown here at VSC. Pi Kapp Ashley Register likes to amuse and entertain the sorority girls. The girls enjoyed this very much.

NSF Announces Graduate Fellowships

ANNOUNCEMENT OF THE NATIONAL SCIENCE FOUNDATION GRADUATE FELLOWSHIPS FOR ACADEMIC YEAR 1962-1963

As one means of promoting the progress of science, the National Science Foundation plans to award approximately 2,500 graduate fellowships in science for the 1962-1963 academic year. These will be awarded between the Foundation's "Graduate" and its "Cooperative Graduate" fellowship programs in such a manner that individuals of comparable ability receive awards in each of the programs. This announcement describes GRADUATE FELLOWSHIPS only; the companion Cooperative Graduate Fellowships are explained in a separate brochure. The two programs differ somewhat in financial arrangements.

* * *

Awards of National Science Foundation Graduate Fellowships will be made to individuals who wish to study or work in the mathematical, physical, medical, biological and engineering sciences, anthropology, economics (excluding business administration), geography, the history and philosophy of science, psychology (excluding clinical psychology), and sociology (not including social work). Also included are interdisciplinary areas which are comprised of overlapping fields among two or more sciences for example, geochemistry, meteorology and oceanography. The fields of research and study covered by these awards are limited to those which conform to accepted standards of scientific inquiry by fulfilling the requirements of the basic scientific method as to objectivity, verifiability and generality.

Awards are not made to individuals for study in a program leading to a degree in the M.D. or doctoral degree or for a course of study designed to prepare them for careers in medical practice or other clinical fields; however, applications will be accepted from those who intend to obtain advanced training in those fields which are considered primary for careers in medical practice or other clinical fields.

Eligibility:

National Science Foundation Graduate Fellowships will be awarded on the basis of ability, in accordance with Section 10 of the National Science Foundation Act of 1950, as amended, only to persons who are citizens or nationals of the United States (or will be by March 1, 1962). (b) have demonstrated ability and special aptitude for advanced training in the sciences, and (c) have been admitted to graduate status by the institution that select or will have been admitted prior to beginning their fellowship tenure. Awards will be made to individuals studying for a doctoral degree, to students who are enrolled in a limited amount of teaching without fulfillment of the requirements of the basic scientific method as to objectivity, verifiability and generality.

Sports Editorial

To many of you it may seem easier to be talking about basketball, but since Valdosta State has no football team, all of our emphasis goes on basketball during this part of the season.

In the last few years the Rebels have made some good records with last year's performance topping the academic year of two semesters (or three years) plus a full summer session must make special arrangements for supervised study or research at their fellowship institution, such as a faculty member who is also a member of the National Academy of Sciences. Fellowships are awarded for the 1962-1963 academic year at the discretion of the trustees of the Foundation, and the Foundation does not make awards to individuals who are not members of the National Academy of Sciences.

The Foundation does not require that Fellows work in residence in the United States at all times. Thus a Fellow may study abroad in residence in the academic year during part (in rare cases, all) of the time of tenure, or if in the judgment of the faculty of the fellow's institution the academic year will be more productive of higher education. Fellowship recipients may not have teaching obligations to pay a Fellow for the cost of teaching an appropriate number of months during part (in rare cases, during all) of the tenure, but may accept up to two months of paid leave at any time in the selection of fellowship recipients.
